Reasons for Allowance

The patents to Sarugaku (4883,938), Fukuoka et al. (5,206,474), Rongo (6,011,241), and Handa et al. (6,096,994) are cited to show prior art welding control systems wherein multiple weld parameters are controlled simultaneously. In particular, Handa et al. discloses setting multiple welding parameters on the basis of selected bead size and bead penetration (see figure 17 of Handa et al., elements 66, 67 and the discussion thereof).

The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches or suggests an adaptive and synergic fill welding apparatus with the features claimed, especially: the limitations associated with the structural elements for obtaining a predetermined base metal dilution as in independent claims 1, 18, and 29 combined with the other claim features; and the limitations associated with the synergic fill number as in independent claims 18 and 29 combined with the other claim features. The dependent claims are allowable at least because they depend from independent claims 1, 18, and 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

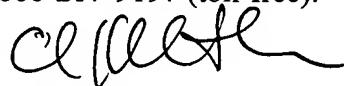

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through
